The KWF with numerous partners helped organize and publish this educational guide to Willows. As a membership based non-profit organization, one of our goals is to promote research and education to help sustain the Kenai River Watershed. Since 1996, our organization has worked for the local community on conservation issues in a non-political / non-partisan manner. We hope you find this guide useful and we look forward to continuing our important work.

Please visit us on line where you may find up to date information about our efforts - please drop us a line or give a call as we would be happy to hear from you.
