

AP Chemistry: Happy Winter Break!

Chapter 7: Starting the next semester ahead.

We won't get to chapter 7 this year and there will most likely be a small number of questions about it on the AP Exam. (It's about atomic structure, electron configurations, and periodic trends.)

So the extra credit assignment is this: take the Chapter 7 Kemper Practice Quiz from Mrs. DePalatis (or you can download it at <http://www2.asd.k12.ak.us/kemper/>) and learn as much from the book as you like. On Monday, January 4th we will have a for free quiz on it in class. Everyone will take this quiz for a completion grade. If you get more than 25 out of 33 questions right, you'll get extra credit points (one point for every one more than 25 right).

Such a deal!

If you have any questions about this, e-mail Mrs. DePalatis at depalatis_laurel@asdk12.org

The next chapter coming up is chapter 15. It is very much a continuation of chapters 13 and 14, so you'd be wise to reread chapters 13 and 14 and then read through chapter 15. It's a good one to have seen before I start teaching on it.

Have a restful vacation!
